Westerdale Council Plans Road Work

The council of Westerdale municipality made their annual inspection of roads last week and made plans for the work during this season.

It was planned to build about 17 miles of road with the elevator, grader and about 24 miles of road with the blade-grader. The grade on the Reed coulee on the Sandre road will be rebuilt and a fill will be made on the west boundary line west of sec 18 31-4-5.

The bridges over the Little Red Deer between townships 31 and 32 and on the Sandre road will be repaired with new abutments and new decks.

Application has been made to the department of public works for new bridges on the Rosebud between townships 31 and 32, and a new bridge at Eagle Creek at sec 8-33-4-5.

Discount On Taxes

The council has decided that they will grant a discount of 5 per cent, on all taxes paid on or before August 31st.

Organize Hospital "Aid" Society

At the meeting held last Saturday to discuss the advisability of forming a "Hospital Aid" it was decided by those present, who were representatives of the women's organizations of the town and municipalities east and west, to organize such a society and the following officers were elected:

President: Mrs. E. B. Parker
1st Vice President: Mrs. N. Eckel
2nd Vice President: Mrs. Hallman
Secretary: Mrs. J. Hugot
Treasurer: Mrs. Basil Atkinson

A meeting will be held on Friday June 8th in the United Church at 5 p. m. to which everyone interested in hospital work is invited to attend.

Installs Electric Welding Equipment.

Barnie Dodd has installed an up-to-date electric welding equipment at the X.I. Garage and is now prepared to do both electric and acetylene welding. Mr. Dodd has had 5 years' experience in welding at Calgary and Didsbury and is prepared to do all kinds of welding work.

Headley Sworn In as Minister of Telephones

Olds U.F.A. Member Becomes Minister of Agriculture.

Alberta's long promised cabinet reorganization got under way shortly after 11 o'clock Monday morning when F. S. Grisdale, former principal of Olds School of Agriculture and member for Olds in the provincial legislature was sworn in as minister of agriculture.

At the same time Hon. George Headley, who relinquished the post of minister of agriculture, was sworn in as minister of telephones, and still retains his portfolio as minister of health.

Further additions to the cabinet are expected to be announced later, and in some quarters among the back-benchers of the U.F.A. party they are causing concern. It is stated that there may be an addition of two labor members and another U.F.A. member.

In connection with the two labor members the name of Fred White, M.L.A. for Calgary and Labor leader in the legislature, and C. Lionel Gibbs, M.L.A. for Edmonton, are mentioned.

It is the taking of two Labor members that is causing unrest, U.F.A. back-benchers pointing out that as there are only four Labor members in the legislature the inclusion of two of them in any cabinet reorganization is out of proportion. However, it is stated that Premier Brownlee inclines to the appointment of Alderman Gibbs, but that the fact that Fred White is Labor leader may make his appointment necessary also if Mr. Gibbs is to be given a portfolio.—Edmonton Bulletin.

Plowing Demonstration Postponed to June 12th

The plowing demonstration which was to have been given by the Oliver Implement Co. at Arden Deadrick's place Tuesday had to be postponed on account of the rain, and the demonstration is now advertised to be held next Tuesday, June 12th.

WEEKLY SERMONETTE

"If Providence did not put us flat on our backs now and then, we would never learn to look up."

WEDDINGS.

TRAUB—PHIPPS.

At the M.B.C. Church on Friday, June 1st, 1934, at 11 o'clock a.m. was solemnized the marriage of Mr. Harley Traub of Didsbury, Alberta, and Miss Glapha Phipps of Garden City, South Dakota.

The bridal party entered the church to the strains of the Wedding March played by Miss Ruby Traub, sister of the groom. The bride, given in marriage by the Rev. C. J. Hallman, was dressed in white crepe-back satin with hat to match, and carried a beautiful bouquet of pink sweetpeas and lilies-of-the-valley. She was attended by Madeline Snyder who wore a pink and sand Canton crepe jacket-dress with matching accessories and carried a bouquet of sweetpeas. Little Phyllis Hughes, dressed in pink and white, and carrying a basket of violets and roses, made a very pretty flower-girl. Mr. Ernest Traub, brother of the groom, acted as best-man, and Messrs. Ozer Traub, Lynn Hunsperger and Lloyd Snyder were ushers. During the signing of the register Mr. Hallman rendered a solo.

The church was tastefully decorated with flower plants, roses and ferns. Immediately after the ceremony, performed by Rev. A. Traub, father of the groom, assisted by the Rev. E. Vincett, the bridal party, relatives and guests gathered at the home of Mrs. Florence Finlay where the reception given by Rev. and Mrs. Hallman was held.

Mr. and Mrs. Harley Traub were the recipients of many useful and beautiful presents. The young couple left by car for a short honeymoon in the Edmonton district and upon their return will take up pastoral work west of Red Deer.

Alberta Spends Nearly \$100,000 Fighting Grasshoppers.

Headley Declares Much More Likely to Be Required Before Season Ends.

Grasshopper fighting in Alberta this season has already cost the provincial government in actual expenses and commitments nearly \$100,000 it is stated by Hon. Geo. Headley, minister of agriculture, and as much more is likely to be required before the season is over.

In the appropriations in legislature the sum of \$9,000 was voted for agricultural pests.

Rain Ends Drouth.

While the crops around Didsbury were not suffering, the generous rain this week was very welcome and it will do immense benefit to the crops, especially to the pastures, which were becoming somewhat dry.

In the southeastern part of the province where the drouth had already taken its toll the rains were especially welcome, and the farmers have been given renewed hopes.

Not only has the rain helped the crops, but it has done its part in checking the grasshopper scourge in the dry belt. Millions of grasshoppers in the south and east were killed in the cold wet rain, and newly-hatched grasshoppers are dead by the thousands in the fields.

EVANGELICAL NOTES

"Children's Day" will be observed at the Evangelical church service on Sunday morning, and the sermon subject will be, "Our Evangelical Missions and Missionsaries." A special offering for missions will be taken.

The annual congregational meeting has been postponed until Monday evening, June 11th.

Pre-Nuptial Shower.

Misses Marie and Edith Chambers entertained at a pre-nuptial shower at their home last Thursday evening in honor of Miss Orpha Liesener who is to be married shortly.

A mock wedding was the event of the evening, and a large mock wedding cake which contained many beautiful gifts was presented to the bride-to-be.

Mrs. A. R. Kendrick poured tea; Mrs. W. S. Durrer cut the cake, and Mrs. Marcellus and Miss Evelyn Liesener assisted in serving.

Tennis Tournament.

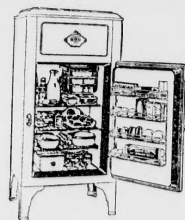

The Didsbury Tennis Club was entertained at Olds on Sunday afternoon last. Three games were played, Olds being victorious in each event after closely-fought games.

To Organize Swine Club.

An organization meeting to form a Swine Club in connection with the boys' and girls' clubs movement will be held in the High School building tomorrow evening (Friday) at 8 o'clock. All interested are invited to attend and should communicate with Reid Clarke.

Have You Seen the "STOR-DOR"

One of the 25 Westinghouse Features

Just one more convincing evidence of the fact that the Westinghouse Refrigerator gives you the utmost in CONVENIENCE as well as in dependability and lifetime satisfaction. The Westinghouse STOR-DOR provides this extra handy space without SACRIFICING INSULATION IN THE DOOR. And remember, Westinghouse with its 25 advanced features, is the ONLY refrigerator that provides dual-automatic protection - a 100% automatic under ALL conditions. There is a correct model for YOUR needs. Let us arrange terms that will make it pay for itself.

Simpler Problems Baffle Man

While world opinion is disturbed and distorted by threats of war and general unrest, while thoughts of budgetary deficits and problems of trade engross anxious minds at home, it is inspiring to turn to concerns of the physical universe which, from time to time, demonstrate man's ability to master infinitely greater problems than those which threaten his peace, security and prosperity. The statement may be true and commonplace, but it is nonetheless true, that man's ingenuity in solving the riddles of the universe is in marked contrast with his apparent stupidity and futility in seeking solutions of others directly within his own purview and which, as a matter of fact, are his own creation.

The thought is suggested by recent addition to scientific knowledge of the atmosphere which is now known to consist of four layers: the troposphere, the stratosphere, the ozoneosphere and the ionosphere. The troposphere, the layer closest to earth's surface, is the stratum of changing temperatures and pressures and of wind-driven clouds. As long ago as 1899, it was discovered, by temperature tests, that this layer terminated relatively abruptly at a height of between six and seven miles. Beyond this height, the temperature was found to be relatively constant up to about 25 miles. The layer of calm, cloudless air of uniform temperature is the stratosphere of comparatively recent conquest by balloon ascension.

As this is written, a prairie dust storm occults the sun and, as a result, there is a marked fall in temperature. It is palpably cooler. It happens that calculations concerning dust shot into the stratosphere by volcanoes prove similar cooling effects. If these seven-hundredths of a cubic mile of fine dust were blown into the stratosphere it could form a screen which would reduce the intensity of the sun's rays by 20 per cent. The screen would remain suspended in that still winnow zone for years, and it has been suggested that the ice ages have been caused by such volcanic dust-strewns.

Recent research has shown that, above 23 miles and extending up to 38 miles, is another layer rich in ozone and, for that reason, called the ozoneosphere. The significance of this layer so far as human history is concerned lies in the fact that, because it is absorptive of ultra-violet rays from the sun, the earth is adapted to human habitation. Without this screen, it is said, organic life on earth would be wiped out by sunstroke.

The ozoneosphere, unlike the stratosphere, is not cold but hot. Above it and beginning at 50 miles, lies another layer, the ionosphere, so-called because the gossamer of the air in that region are in an electrically excited or ionized state. The secrets of this stratum are yielding to radio research although its existence had been deduced long before the advent of the radio, to explain some of the earth's magnetic phenomena. The ionized particles have the property of reflecting radio waves back to earth and it has been revealed there are two main layers in the ionosphere, at 64 and 112 miles respectively, which reflect these waves. Each of these is split into two during the daytime making a total of four layers. These four layers probably mark the heights at which particular constituents of the atmosphere become electrified or ionized.

Recent research has further demonstrated that the electrification in the layers is more intense in summer than in winter, the condition being normally aided by ultraviolet rays from the sun. Thunderstorms also play their part, it having been calculated that the electrical energy continually released in thunderstorms is more than sufficient to produce all the observed ionization in the ozoneosphere.

That scientific minds are led to investigation of the seemingly inaccessible have produced so much positive achievement is in striking contrast with the meagre fruits of the efforts of politicians, statesmen, economists and "brain trusts" to solve the problems of man's social and economic relationships. It suggests the thought that, were scientifically trained minds set freely and independently to work, by universal agreement, upon the problems which even destined to perpetuate unbridled hatreds between peoples of kindred cultures and similar aspirations, their solution quickly would be forthcoming. The rest would be up to us.

Charting Coast Of Labrador

British Naval Surveying Ship, *Challenger*, has sailed from Portsmouth to resume her task of charting the coast of Labrador. This work has never been completed. Last year the admiral started the *Challenger* upon the work because it has become necessary to provide a chart for navigation along this dangerous coast owing to the development of Labrador. The survey will take years to complete.

New tax rates in Holland, Ireland, King Leopold's of Spain has a country estate at Tuxedo, Pa.

FINE QUALITY TEA
ALWAYS ECONOMICAL

Packets of the finest teas such as "Salada" have been found to increase prices. As soon as merchants' stocks of present low prices are depleted your favorite beverage will cost you slightly more. This has been brought about by advances at the gardens where production has been purposely restricted in order to save the growers from further disastrous loss. But this comforting beverage is still the cheapest drink in the world best to give itself.

As a matter of fact, your neighbors think just as insignificant things about you as you do about them.

Christmas merriment and yuletide but you made an entrance into Holland for the first time.

Weary Days—Sleepless Nights
Wrack the Nervous System

Men and women lose night after night on sleepless beds. Their eyes do not close in the relaxing repose that comes to those whose nerves are right. They are irritable and nervous, weak and worn out, and everything looks dark and gloomy.

Milburn's H. & S. Pills is the remedy that is required to restore them the blessing of good health. They bring back the sound refreshing sleep, tone up the nerves, and impart that sense of buoyancy to the spirits that is the result of renewed mental and physical vigor.

Russian Aviators Have
Completed Big Task

Rescued 101 People From Floating Ice Off Siberian Coast

Two months ago 101 Russians were wrecked on floating ice between Wrangel Island and the coast of Siberia. Since that time the efforts of Russian aviators in rescuing the 101 a few at a time has held the interest and admiration of the world. The task was recently completed. Not a life was lost.

Moscow, aware of the rich mineral resources of this Arctic island whose accessibility has become proverbial, rashly determined to populate it with permanent colonists. Of the 101 there were ten women and two children. After their ship had been crushed, the adventurers, who had plenty of food and fuel, built living quarters on the ice and were not uncomfortable in spite of the sub-zero temperatures. They suffered little, but they were constantly in peril, for the breaking up of the ice might bring death at any moment.

The organization of the relief work was thorough and systematic, and its success is a tribute both to the skill and to the indomitable courage of the Russian aviators. It is not without reason that Moscow is celebrating, by pressing the efficiency of Soviet organization, the hardship of the harassed men and women, and the devotion and ability of the rescuers. One Moscow newspaper comments, perhaps with reason, that if the disaster had occurred in the days of the czars the Wrangel colonists would all have perished while bureaucratic officials argued as to which department should undertake the rescue—Cleveland Plain Dealer.

CAST OFF UGLY FAT

Woman Loses 28 lbs. in 3 Months

"Three months ago," a woman writes, "I was persuaded by Dr. Kruschen Salts to reduce my weight, which was 222 lbs. I had tried other things, but all to no avail. Now I am 194 lbs. The results are different. In three weeks I lost 5 lbs., and I felt five years younger. I really must say I feel a different woman. I have now lost 28 lbs. to date."

Mrs. S. G. L. If you are overweight take one half-teaspoonful of Kruschen Salts in a glass of hot water before breakfast every day. This will be an aid to rapid or alarming loss of weight, but just a steady decrease of that fatty fat which is as unhealthy as it is unsightly. Kruschen is a scientific blend of six mineral salts found in the waters of the Swiss Kautzen spas that have been used by generations of overcast people to reduce weight.

Light Clothes For Warmth

Several Layers Better Than Small Number Of Heavy Ones

Very thick, heavy garments are not so helpful in ending one to keep warm, as might be supposed. A far better way to defy the cold is to wear a larger number of light ones. The late Lord Kelvin was a great believer in this method. On one occasion when he was making tests of his sounding machine on a battleship on a bitterly cold day, he was asked why he did not wear an ulster. His reply was that he did not need one. The colder the weather, the more thin underclothes he put on, and the air between them insulated his body from the freezing winds. Many fishermen have also found that several layers of light garments are more so than a small number of heavier ones, and act accordingly when facing the intense cold frequently encountered on their winter fishing trips.

Seems Hard To Solve

Perhaps, they thought, it is a happy medium between the methods of young scientific students of babies and the methods of their grandmothers. A Baltimore specialist condemns the modern method which leaves babies too much alone. It is curious that after several hundred thousand years' experience the human race has not come to definite conclusions as to how babies should be brought up.

Deep Sea Exploration

Diver Will Spend Six Months Studying Fish In Ocean's Depths

Even though he plans to drop 3,000 feet down into the depths of the ocean in a diving glove, William Beebe doesn't expect any sea serpents.

"I saw one once," he said, a grin wrinkling his weathered face. "Then I took a second look. At first glance it was a tremendous sea serpent writhing away into the horizon. It turned out to be the Atlantic cable."

Mr. Beebe was making last preparations for his departure for St. George, Bermuda, where he will spend six months studying deep sea fish and the strange, weird life they lead.

Huffaly: "The new boss of the factory'll be an old-fashioned man. I'm thinking."

O'Hara: "He's no old-fashioned he'll be taking the bells from the drive wheels and repainting them with suspensions."

Husband: "Why did that woman keep you standing at the door for half an hour?"

Wife: "She said she hadn't time to come in."

Got Post War Job

Showed One-Armed Man Who Did Great Things For England

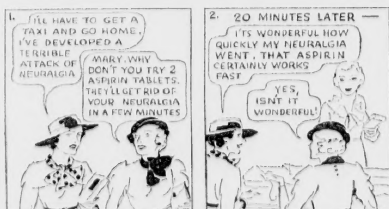

The story how Sir Edward Hilton Young, minister of health, who lost an arm in the 1918 raid on Zeppelings, got a post-war job with the admiralty was told in a speech by Lord Riddell. Sir Edward, Lord Riddell said, came back from active service and sought a position with the admiralty only to be told there was "no room for a one-armed man."

"Sir Edward," he said, retorted: "Well, come with me to Trafalgar Square and I'll show you a one-armed man who did great things for England."

That, concluded Lord Riddell, was too much, "even for the admiralty," and one of his chiefs replied: "If you are another Nelson we will take you on."

Favor Smaller Bank Notes

The Montreal Board of Trade is in favor of smaller banknotes and announced that a communication had been sent to the Hon. E. N. Rhodes, minister of finance, Ottawa, suggesting the change. The board believes the opening of the Bank of Canada would be an appropriate time to alter the dimensions of the bills.

Almost Instant Relief
From Neuralgia

For Quick Relief Say ASPIRIN When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the *fastest safe relief*. It is said, *get discovered*.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, after several hundred or two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after it is taken.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly when you swallow it. And this is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S quick relief, be sure the name Bayer is in the form of a cross in an every tablet of Aspirin.

Does Not Harm the Heart

Federal Minister Of Agriculture Gives Some Interesting Facts About Crested Wheat Grass

In the course of an answer to a request in the House of Commons for information regarding crested wheat grass, Hon. Robert Weir, minister of agriculture, gave many interesting and valuable facts. I think it is a safe statement to make, he said, that the hope for crested wheat grass and what it will accomplish is even greater than I stated to the committee a year ago and I recall that in that statement I was quite enthusiastic. As the hon. member has indicated, especially in districts where there is a great lack of moisture, crested wheat grass is particularly suitable. Even in our many fertile stations where there is a considerable area that has been abandoned by farmers on account of lack of moisture, experiments have been made with crested wheat grass, brome, sweet clover, western rye grass and some other grasses, comparing them as to the growth they make with a limited amount of moisture. In these experiments, crested wheat grass showed itself much superior to the other grasses. One noticeable thing about these plots was that in the crested wheat grass plot there were practically no weeds; its tendency to absorb the moisture was so great that there was not sufficient moisture left for the weeds to make headway. Another advantage of this grass is that it is a cool weather grass as well as a dry season grass; when the snow goes off in the spring this grass is as green as it is perhaps at any time of the year.

Also crested wheat grass is a palatable grass and it has a high yield of seed. In the fall when the cold weather comes on, it seems to take on new life, because it is particularly adaptable to cool weather and remains green and maintains a fine growth until covered by snow. Another important characteristic of this grass is that it is a cool weather grass as well as a dry season grass; when the snow goes off in the spring this grass is as green as it is perhaps at any time of the year.

One of the hardest tests that crested wheat grass has experienced was in a seeding that took place on the farm of Professor Harrington in Saskatchewan. He had a crested side walk running through the lawn, both sides of which were seeded with crested wheat grass, particularly of the fairway strain, which is one of our most likely strains for lawns on golf courses and for laying down sod in Western Canada. It is a strain that is rich in foliage and spreads more than some of the other strains of crested wheat grass. One side was watered and protected, on the other side the children of Professor Harrington and his neighbors played, and it became almost like a pavement. Then towards the middle of August it also was watered and protected. It responded very quickly, and before winter set in showed an excellent growth.

It has always been realized by those interested in diversified farming, particularly in the west, that the need was for a domestic grass. We believe that in almost every respect crested wheat grass will meet that need, not only in the dry areas, but it also stands up well in the northern areas. At the Indian Head station some years ago, two pounds I believe, were seeded very sparsely and there were thousands from this patch 1,329 pounds of seed. That also is another very important characteristic of this grass, its high yield. Another important feature is that one can allow the seed of crested wheat grass to mature and then cut and thresh it, and the stubble of the grass will remain green and palatable, unlike western rye and other grasses of that nature, which, if allowed to ripen in the least, become woody and dusty and not palatable.

Nearly 20,000 books were purchased in England in the last 12 months.

W. N. P. 2045

Livestock In Demand

Higher Prices Now Being Paid For Breeding Stock

The demand by farmers for livestock for use and breeding purposes is increasing. The average price paid for horses at the Regina Winter Fair, including a number of broodmares, was \$75 per head. One team sold for \$350 and another for \$325. This is regarded as an indication of the return of the horse to popular favor.

The average price realized for Shorthorn bulls was \$114, compared with \$87 a year ago. Hereford bulls averaged \$104, slightly up from the previous year, and the average for Aberdeen Angus bulls rose from \$88.50 a year ago to \$122.50. The best price for a single animal was \$240, and several sold for over \$200 each.

Every breed now offered sold at a good price. Thirty-six brought an average of \$27.55; the top price for an individual was \$44 and the second highest price \$30. The good figures paid for bred sows reflected the prices now being obtained for select barge hogs.

Saskatchewan is the largest wheat-producing province in Canada and one of the chief wheat-growing areas of the world, and the trend to horse power and stock raising is regarded as significant.

Was Noted Inventor

Dr. Thaddeus Cahill Gave Up Law To Follow Hobby

Dr. Thaddeus Cahill, 76, who devoted the legal profession at the age of 20 to become an internationally known inventor, died in New York recently of heart disease.

Turning to electrical and scientific study at an early age, he invented an electrical typewriter and a device for producing music electrically, known as the telharmonium, which attracted the attention of governments abroad.

He constructed a plant in West 50th street, where musicians played on electrical keyboards and their music, carried by wire, was heard in Carnegie Hall and other places in New York as well as in Boston, Springfield, Baltimore and Washington.

One of the earliest radio broadcasts of music was made from Dr. Cahill's station by Dr. Lee De Forest. He was a native of Iowa.

Not Much Called For

An artist who was spending a holiday in a small village entered the store and asked if they stocked comb hair brushes.

"No, sir, we don't," the shopkeeper replied. "Yace, sir," he added, apologetically, "we never have need for 'em. Nobody in these parts seems to keep combs."

All Dressed Poultry Imported Into United Kingdom Will Carry Mark of Country of Origin

Survival Of Civilization

Time Is On Its Side If Peace Be Granted

In a speech in London recently Mr. Huxley, the present assistant secretary of the treasury, again declared that in his opinion "the character of the present depression is above all a shortage of consuming power, due to the shortage of money."

And within an hour or two of Mr. Huxley's declaration, no less fantastically a politician than Mr. Churchill, in an unprovoked broadcast, was permitted to announce that without a revolution and with a little commensurate the spread of the plume which science had bestowed upon us could be easily brought about. While the welcome grass is growing, however, the steel is starving; and, most unfortunately, the time is all too short for its slow but sure maturing. Given the security of a few more years of peace, we should be content in the confidence of the triumph of social credit over all its present critics and enemies. Time is on its side if peace be granted. But as the clouds are indubitably gathering for war on a scale hitherto only dreamed of in nightmare, it appears to be all too probable that, as Professor Murray has said, civilization may die not only with the cure of its hands but in the presence of doctors who lack only one thing to save their patient. It will, London New English Weekly.

Shortage Of Flax

Western Lined Oil Mills May Have To Import From Argentina

Unless production of flax in Western Canada now almost entirely suspended, is resumed soon, three western lined oil mills, one of them at Medicine Hat, may have to turn to importing from the Argentine, it was learned. Canadian export production of the seed last year was insufficient to meet the demand of the mills.

Failure to supply the 240,000 bushels consumed by the Alberta mills means a loss of \$600,000 a year to the Alberta farmers, according to W. A. Church, the Medicine Hat mill manager. At one time Alberta produced more than 1,000,000 bushels of flax a year but last year the figure fell to 500,000 bushels from 10,000,000. The field crops branch of the Alberta department of agriculture has endorsed the suggestion that acreage now seeded to wheat should be sown with flax.

Parents of 10 children in Italy are now exempted from taxation, while between the ages of 25 and 60 are heavily taxed.

World trade has fallen so low that more than one out of every five ships of the world's tonnage is laid up.

Under an amendment to the British government Merchant Marine Act, which will take into effect on and after June 22, all dressed poultry imported into the United Kingdom will have to carry an indication in a conspicuous manner of the country of origin.

Canada has an important export trade to Britain which has been particularly active. It is believed the new regulation is not likely to be a handicap to that trade.

The act lays down that each bird must be marked legibly and durably on a seal of disc of a resonant character and not less than two centimetres in diameter, securely attached to one of the wings of each bird by a durable attachment passing through a circular hole at least one centimetre in diameter, punched or stamped through the web of the wing; and in each case the indication of origin shall be printed, stamped or embossed on such seal or disc in letters not less than one and a half millimetres in height.

This order is going to affect Canada as the Dominion exports substantial quantities of poultry to Britain, particularly during the Christmas season.

"Some may consider this order a rather serious handicap to the export of frozen poultry when has not previously been marked," state officials of the livestock branch of the Dominion department of agriculture.

"Of the 10,000,000 pounds of poultry ordinarily stored in Canada it is by no means possible to indicate in advance what proportion is going to be required for export. The marking required for the British market would have no special significance for Canadian trade unless each bird were similarly tagged with the grade name. Most of the Canadian poultry going forward is so marked and it will be comparatively simple to comply with the Canadian with British requirements in this respect. In view, however, of the extreme difficulty, if not almost impossibility, of marking frozen poultry as required by the British order after it has been frozen, Canada is particularly fortunate inasmuch as she has already available on the London docks a defrosting plant which will permit of the marking being done after the birds have been defrosted."

Control Of Emotions

Psychologist Believes It Is Necessary To Suppress Freedom Of Emotions

The belief that children's emotions should not be suppressed was branded as "absurd" by C. R. Myers, consultant psychologist of the Ontario department of health, in addressing the Social Service Council of Canada at London, Ont.

Mr. Myers enlarged upon the possibilities of what might happen if children were allowed freedom of emotion. "We don't suppress emotions all the time," he explained, "civilization would be impossible. Think what would happen if we went in and had a fight every time we became angry or ran away every time we felt hurt."

Children had no rational control, he explained, and the social order developed by a person who grew older. There was no fear of death in the minds of children.

What he stressed as "rational control" was more important, he said, was intelligence, he said.

To Whom It Concerned

Mrs. Brown had reason to be concerned over colored cock (rather chicken). The victim looked down at her suit sitting until she reached the kitchen, when her voice could be heard in shrill vibration. She said because the chicken said so indicative exclamations that her mistress hurried downstairs. "Why, Liza," she began in surprise, "who on earth are you taking for?"

"Ah, ah, talkin' to nobody," was the reply, "but ah don't hear who in his house he's in."

PICTURESQUE SCENE GREETED PRINCE GEORGE IN BECHUANALAND

When Prince George was in the Bechuanaland Protectorate during his tour of South Africa, he paid a visit to Gaborone to attend the native celebrations and sports held in his honour. This remarkable photograph, taken under the burning African sun, shows a group of Waiters Native Girl Guides performing the "POT DANCE" before His Royal Highness.

To Visit Packing Plant.

Arrangements have been made for a visit of those who care to go to the stockyards and Burns Packing plant, Calgary, on Thursday, June 14th.

Those intending to take in this trip should be at the Exchange Building, Calgary stockyards on the morning of the 14th at 10. The stock yards will be looked over and some interesting talks given by the men connected with the cattle business. The party will then be taken to the P. Burns Packing Plant where lunch will be served, and then a trip through the plant.

This visit to Calgary will prove most enjoyable, interesting and instructive, and farmers of the district should organize parties to take the trip. Anyone interested should communicate with Mr. F. E. Shiner, Oils, who is responsible for the arrangements.

BASEBALL.**ROSEBUD LEAGUE****Innisfail Uses Three Hurlers In Beating Didsbury.**

Innisfail defeated Didsbury 9-7 in a regular Rosebud League fixture Wednesday afternoon last, the game being mostly responsible for the Didsbury loss.

George Geiger went the route for Didsbury and twirled a fine game. With better support he would have had an easy win. Mallinson started for Innisfail but lasted only four innings, when Dodd, a slow ball artist was sent to relieve. Didsbury started to get wise to the slow ball in the 5th frame so Sick was sent to the rescue and had no difficulty finishing the game.

The work of Holab in the centre pasture for Didsbury was a feature of the game.
Batteries—Innisfail: Mallinson, Dodd, Sick and Ray. Didsbury: G. Geiger and Woodcock.

Score by innings: RHE
Didsbury 129 300 010 7 7 8
Innisfail 010 003 110 9 8 4
Umpire: F. Kaufman.

Did You Ever Stop to Think—

That the merchants of Didsbury render service with the goods they sell.

They do their best to please their customers. They know when they please them they may make steady customers.

They have a wide selection of reasonable merchandise from which to select.

They want all the business of the home town.

They should get it.
Home pride and a desire to help Didsbury should influence all citizens to buy at home.

When they help to make better business for their town they are helping themselves.

Earning money in one place and spending it in another is poor business.

There is no excuse for buying by mail when everything needed can be bought at home.

"Kritiks' Korner."

The "Kritik" paid a visit to the golf course recently and it looks as if some of the boys have fallen down on their job of fixing up the greens.

It would be of convenience to pedestrians if the lower limbs were pruned off the trees which are overhanging the sidewalks in different parts of the town. During the wet weather this week one walking on the sidewalks was apt to get a showerbath.

An improvement would be made on Main Street at the evening at the municipal office either renewed or removed.

—"OBSERVER"

A Tea and Sale of Homecooking will be held in the Leuzler Block Saturday, June 9 from 2:30 to 6 p.m. under the auspices of the C.G.I.T.

Women's Association Will Hold Meeting at Knox United Church

The Women's Association of the Red Deer Presbytery will meet in the Knox United Church on Friday, June 8th at 2 p.m.

The president, Mrs. Lundren of Innisfail will lead the choir, and the Rev. Theo. Powell, D.D., of Calgary, superintendent of missions for Alberta will be the guest-speaker.

Reports from the various women's associations in the presbytery will be given, and an attractive program provided by local talent has been prepared.

The public are very cordially invited to attend.

Sylvan Lake Orchestra Will Play for Dance Opera House, Friday

Hobart Cowan and his 6-piece dance orchestra will play at the Opera House tomorrow (Friday) evening.

This aggregation of exceptional talent has been engaged for the season to provide the dance melodies at Varsity Hall, Sylvan Lake, and the local dance fans are fortunate in having them play here tomorrow night. Their music is sensational, snappy, smooth and smart. Dixie Stewart the pianist and singer is a well known radio commission artist. A worthwhile dance evening is assured.

HERE AND THERE.

Three cruises to the Norwegian fjords and the Land of the midnight Sun will be made by the Empress of Australia this summer. The first cruise, of 14 days, leaves Southampton June 29, the second from London July 14, for a 19 day trip as far north as Hammerfest, North Cape and Spitzbergen, and the third from Inverness, 22 days to the Gorda and Oslo and Copenhagen. Connecting sailings from Canada for the three cruises are the Empress of Australia from Quebec June 21, the Duchess of Atholl from Montreal July 6, and the Duchess of York from Montreal July 20.

Your favorite picture stars, from Greta Garbo to Betty Boop will be seen as well as heard aboard the "Duchess" liners, as well as the "Empresses" of the Canadian Pacific this summer. The Duchess of York are already equipped with talking picture machines and the Duchess of Atholl and Duchess of Richmond will have them for their first voyages this summer. The Empress of Britain and Empress of Australia have been showing talkies for some time now.

The Easter holidays, commencing March 29 and extending to April 3rd, offer an exceptional opportunity for travel. The Canadian Pacific Railway is making generous fare concessions and indications are that extensive travel programmes will be carried out by Canadians and visitors to the Dominion.

A large party of Holy Year pilgrims from the Maritime Provinces sailed from Halifax recently in the Canadian Pacific liner Montclare. On Easter Eve they will be received in audience by the Pope. They will visit London, Paris, Milan, Assisi and other cities in Europe before returning to Canada at the end of April.

OCCASIONAL WIFE

By EDNA ROBB WEBSTER

Author of "Jettie," "Lipstick Girl" etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in their prime, are deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a commission for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is gluing commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former room-mate with whom he has quarrelled. At a party at an exclusive club Peter catches Camilla's gaze with impatience. When the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the bench by themselves and fall asleep on the bench. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Bowman and Weston, an advertising agency, where Camilla has submitted some of her work, send for her and offer her a salary of \$500 a week to work as a prospect of having it doubled. She tells Peter of her good fortune in securing employment. Mrs. Hoyt is also informed that Camilla has obtained work and is going to leave the Hoyt household. Avis rents a studio on the same floor as Peter, and invites him to have lunch there. He accepts reluctantly, but is favorably impressed with his visit. Camilla upon returning to accept some of her earnings, to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Worth calls and persuades Peter to accept a loan of \$1000.

(Now Go On With The Story)

CHAPTER XLII

"By the way," Peter said suddenly, "we are invited to a party for Saturday night. Avis is having a hot steam-steam, I suppose you would cut it and she commands our presence."

A little frown shadowed Camilla's face for an instant. "I can't understand why Avis took that large studio when she does practically no painting."

"I suppose because she can afford

To do whatever she fancies. Just a whim for the moment."

"No doubt. But even so I wonder why she didn't take a place in the Craft building, since money is no obstacle. The apartments are even more modern than my home here."

"She doesn't think so at all. I asked her the same question. She says the old building is ever so much more artistic and has more atmosphere than the new. And you know, her suite looks out on that little garden court with a window-sill view from each room. I don't know but she's right at that. Her furnishings are ever so much more effective in those high ceilings rooms than they would be in the low rooms of the Craft building, with narrow corridors and shining new varnish. She has some gorgeous stuff."

"Oh, you've seen her apartment?"

"Of course. Being her nearest neighbor, I had to pass inspection on it before she opened it to the public," he said lightly. "She's going to have me do some things for her when I get time, too. First prospect, old girl. So you must be ever so sweet to the new client. Remember, the customer is always right, whether she is or not."

"Just at the time she isn't, but I'll do my best for the cause," Camilla smiled gallantly. A little secret frown clutched at her heart was it pretension or warning?

But she quickly dismissed any such depressing thoughts, in the ecstasy of that night with Peter. He was once again her gentle, understanding lover, who laughed delightfully at her quaint remarks and gestures, and told her how much he had accomplished during the three days since she had seen him.

Neither of them referred again to the harsh words of their last meeting, and they each believed that the experience was erased as completely as the day itself that had slipped into the past of countless yesterdays. She lay in his arms and heard the deep resonance of his voice with sweet content, but her heart in his ardent kisses and dreamed again of that happy day when they would be together forever.

Camilla would have preferred to decline the invitation for Saturday evening, but she recognized the obligation to another of her employers and duties which she would be called upon to meet many times in the course of her career as Peter's wife. In his she would have to serve his public. The more famous he became, the more public would be his private life. But any duty became a pleasure when it involved being Peter's wife, which position more women would envy her as he advanced.

Avis was one of the first of these. Camilla knew that. She never had been particularly fond of Avis Worth and her very obvious personal interest in Peter did not diminish her aversion to the other girl. It might be flattering to Peter to have other women adore him, but it did not make life more secure for his wife.

Camilla told herself that such a condition should also be flattering to her that this man whom other women coveted had rejected her from them all, to cherish and honor for all his life. But that was just the trouble, exactly, her caution reminded her. For all his life would probably be for a long time, and there was always a chance.

The studio party was a magnificent gesture to make an impression upon each and every guest for a long time to come. Most of them knew the kind who had grown up in the kind of impressions, it probably faded in that respect, with two exceptions. And those two were the most important targets at which Avis was aiming so that was all right.

One was Peter, for every woman who is in love will exert herself to the utmost to impress the man she loves. The other was Camilla, who was much more accustomed to expensive displays than Peter, but Avis especially wanted to impress Camilla with the fact that she now held the advantage over her with respect to having money for anything she might wish to do. She did. Camilla knew that although she now felt financially secure about providing for herself, even that salary which she regarded as very good for a beginning was only a mite as compared to the cost of Avis' party.

Best for You and Baby Too

Baby's Own Soap

Its fragrant bath soothes & cleanses

The guests were many and varied. Avis own social group, art students and critics, established professionals, favorite models, friends of both the Craft building and the times. They drifted in and out all the long evening, danced, ate, drank and made merry, with the generous encouragement of the hostess and her beverage.

For effect and appreciation, she had selected several paintings and sculptured pieces from the most distinguished of her guests for a private exhibit. They added to the attractions and assured her the approval of the leaders of her adopted profession as a patron of the arts, at least.

To a certain extent, her efforts linked the producers and the market, and one did not actually culminate from the affair.

Avis was stammering in wide-mouthed black net, like delicate spider-webs that were revealed that concealed her white shoulders and model form and petal-bellows below the long, fair skirt that left the line of her figure half way down to swirl in a clinging fullness as she moved gracefully among her guests.

She had most of the time to Peter's arm, having taken possession of him as soon as she arrived and saying sweetly to Camilla, "I am sure you won't mind if I give Peter a little the better of this evening. He needs to know people the kind of people who are here to-night, and I want to be sure he meets everyone and they remember who he is. I want everyone to know you, too, but you already know more of them than Peter does and after all, he is the one who has made an impression with the right people, if he is going to succeed." She indicated her head toward a group across the room toward her, her voice. "I especially want him to meet my uncle, Mr. Dunforth, who is one of the judging committee for the National exhibit. I'll introduce you later, my dear."

As a matter of fact, she failed to do so, but Camilla gave no thought to it. She was just as anxious for Peter to meet Mr. Dunforth as Avis was.

She smiled a generous approval of her hostess' plans. "Of course, I want you to introduce Peter to everyone. Is there anything I can do to help you?"

"Indeed there is. Help everyone you know to get acquainted with everyone else. There's Terry over there," she added significantly. "I know he will be delighted to see you again."

Terry was delighted, and expressed his pleasure in an uncertain word and gesture. He took possession of Camilla much as Avis had done with Peter. Camilla wore a short frock of cherry red, with cut crystals for ornaments, and more eyes followed her about on Terry's arm than noticed Avis and Peter.

But Avis gave no heed to that, it she noticed it at all. It was Peter's attention which she sought, and held throughout the evening. Except to those who knew he was married, she made no reference to his wife and Peter did not make the omission. He was gravely anxious to make that impression for which Avis was striving, grateful for her for her usefulness and earnestly convinced that she was doing him a very generous favor.

Mr. Dunforth was a solid little man

with a handsome head and a Van Dyke beard, who inspected Peter's height with evident approval and appeared to be adequately impressed. Avis made sure that he would not forget Peter.

"Uncle John, I want you to know Peter, Anson," she explained distinctly. "He is that favorite pupil of Professor Drake's, who finished National this year, and is entering a piece in the Paris scholarship exhibit. I told you about him before."

"You shouldn't tell him everything you know about me," Peter chimed her with good humor.

Dunforth clasped his big hand firmly. "Yes, indeed, it is a pleasure to know you, Mr. Anson. I look forward to seeing your work. Avis has spoken of you often in fact, ever since I have seen her recently," he laughed. His manner might have implied that Peter was not a married man, and an object of Avis' affections.

But to no one besides that, and the two men entered into an amiable discussion of sculpture, with an interested comment of two from Avis. She was clever enough not to stress too much her interest in Peter's exhibit, but her objective was to have Peter explain himself, impress his charming personality upon the audience who would hold one of the votes which should determine Peter's future career.

(To Be Continued)

Has Faith In Theory

Young Research Worker Believes Revivification May Be Possible

The pink tongue of a dog, revived from death, hopped eagerly as milk was poured into its mouth and Dr. Robert E. Cornish said he hoped the animal's increasing strength eventually would enable it to survive and thereby advance his revivification experiment to aid mankind.

Dr. Cornish, young research worker at the University of California, believes his theory of revivification some day may be applied successfully to human beings who have died from heart failure, shock, submersion and asphyxiation.

The animal, now known as "12" because it was put to death clinically on Friday, April 12, appears to be in a deep stupor, and Dr. Cornish explained the dog has not recovered his mental faculties.

"I hope the dog's brain eventually will become restored to the condition it was before death," Dr. Cornish said.

"The dog was dead four minutes by medical standards. It was asphyxiated, the heart had stopped beating, it ceased to breathe and its blood had limited its circulation. There is no question the dog was dead."

"Then I injected heparin to start its heart and defibrinated blood into its veins and within a minute its heart was beating."

There are wide fields that he beyond My narrow boundaries. And past the fields are mountains tall And further, plains and seas.

O, gladly, gladly do I pass Through life and death and change of ways To learn the loveliness life holds And all its joy, its praise.

Life's meanings I could never gain, Its truths I could not prove Until the gate swung wide for me. The gate? The gate is love!

Induces Conversation

A man may be a dull in business, in finance or industry, but it is very rarely that he cannot participate in a discussion as to whether his partner had his hand properly or whether he should or should not have taken a certain finance. In fact, we need of nothing so productive of varied and animated conversation as a game of bridge.

Of German invention is a tiny pack back to be saved inside a coat to fasten it against theft on a closet bar or hook.

Too Much "Party" Last Night

Too Much Food, Late Hours, Smoky Atmosphere

YET—This Morning No "Acid Headache"—No Upset Stomach

Scientists say this is the QUICKEST, SUBSTANTIAL AND EASIEST way to combat FEELING THE EFFECTS of over-indulgences—the most powerful and neutralizer known to science. Just do this:

Take 2 tablespoons of Phillips' Milk of Magnesia in a glass of water BEFORE bed. In the morning take 2 more before breakfast. The juice of a WHOLE ORANGE. That's all you'll feel good.

Or take the equivalent amount of Phillips' Milk of Magnesia tablets. Each tablet is equal to a teaspoonful of the liquid.

Get genuine Phillips' Milk of Magnesia in the Liquid form, or the new, marvelous convenient tablets. Be sure it's PHILLIPS'—the kind doctors endorse.

NOW IN TABLET OR LIQUID FORM

Little Helps For This Week

"For this is the will of God, even your sanctification." 1 Thessalonians 4:3.

Between us and Thyself remove whatever hindrances may be. That so our inmost heart may prove a holy temple, meet for Thee.

Bear in the presence of God to keep Thyself seek to know for what God sent thee into the world, how that thou failed it, to that yet what God willed thee to be, what yet lacketh unto thee, what is God's will for thee now, what thing thou hast not yet by His grace to obtain. His favor and approve thyself unto Him. Say to Him: "Teach me to do Thy will for Thou art my God," and He will say unto thy soul, "For not I am thy salvation." He will speak peace unto thy soul. He will set thee in the way. He will wear the above guise of men and things which perish in thy grasp, and give thee, if but afar off, some glimpse of His own enduring steadfast, unchanging brightness and bliss and love.

Genius At Calculation

Seven-Year-Old English Boy Has Treasury Gift

Try this for a mental snap, multiply 254,489,612,896 by nine! You may not be able to do it, but little seven-year-old Lenon, Heaton, of Russell, L.C.C., School, Burnt Oak, Middlesex, England, can. Without pencil or paper to help him, he rattled off the answer 2,290,404,516,064, within eight minutes. He has been two years at school, and while other children are stammering out their "times" he is, he is thinking in millions. His calculating genius is not inherited. "I counted the first five figures and remember that," he said. "Then I counted the next five and remember them and so on." He then takes all the figures which he has photographed in his mind and pieces them together in a panorama of millions. And he can repeat the answer backwards!

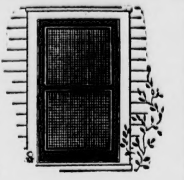

Can you remember what currency you were dealing a year ago?

"It Helps Me!"

That's what 98 out of 100 women say after taking this medicine. It quiets quivering nerves, gives them more strength before and after childbirth, takes them over Change of Life, makes life seem worth while again.

Mountain View Notes

Church and Sunday School are being held in Community Hall each Sunday morning at 11 o'clock. Everybody welcome.

The tea and sale of homecooking held in town under auspices of the local W.I., proved a success, and the members wish to thank all those who helped make it such an enjoyable affair.

A baseball game took place on the Neapolis school ground Friday last when the Mona pupils provided the opposition. A fine game resulted with the score in favor of the Neapolitans.

Mrs. A. M. Nisbet, W. Nisbet and L. Towers were visitors in the community last Sunday.

Westcott Notes.

The May meeting of Westcott W.I. was held at the home of Mrs. MacFarlane on May 31st, with 15 members and 7 visitors present. The roll-call was answered by naming a way in which to help a child morally or spiritually in the home. Mrs. S. Owens was appointed delegate to the conference on June 28th, and Mrs. J. Robertson was appointed to attend the Hospital "Aid" meeting. A talk on the League of Nations was given by Mrs. Ray, and a reading, "The Food Crank" was given by Mrs. Hasegood. A contest on "The 12 Most Important Articles for a Medicine Cabinet" was judged by Miss Ruth Johnston, the winner being Mrs. J. Robertson. A paper on "Child Welfare," dealing with the moral training of a child, was given by Mrs. Hughes. Mrs. Shoultice conducted a questionnaire on the first economics lesson. The meeting adjourned with "God Save the King," and lunch was served.

Jutland Notes.

Friends of Mr. and Mrs. Norman Bowles who moved last summer to Oklahoma school west of Innisfail will be interested to learn of the success of Mr. Bowles' school in the school dramatic and musical festival held at Innisfail on May 30th under the auspices of the I.O.D.E. In group events such as action songs, choral reading and dramatizations the school won one 1st, three 2nd and one 3rd prize. Out of four recitation events the school obtained one 1st and two 3rds. The school also won the junior dramatic cup, and Patricia Rothwell, Mrs. Bowles' daughter, was given a medal for securing the most points in reciting "The Torch of Life." The rural challenge shield was also earned by Oklahoma for the highest number of points of any rural school.

WEEKLY JOKE

It was a sleepy sort of day: the class was about half the usual size, and the professor was calling the roll in a half-absent manner. To each name someone had answered "here!" until the name Smith was reached. Silence reigned supreme for several moments, finally to be broken by the professor's voice—"My word, hasn't Smith any friends here?"

LOCAL & GENERAL

Mr. Norman Clarke made a business trip to Edmonton this week.

Mr. T. DeWitt was a southern city visitor Tuesday.

Messrs. C. H. Adshend and Ed. Ford attended a meeting at General Motors, Calgary on Tuesday.

Mr. and Mrs. Larry Leavens left last weekend for their vacation at Fox Warren, Man.

We notice that Tommy Johnson is driving a new Chevrolet coupe purchased from Adshend Garage.

Mr. Norman Steele of Youngstown, an oldtimer of this district, left visiting with Mr. and Mrs. Moss during the week.

Mrs. D. Edwards and Mrs. J. A. McChes are attending the Provincial Chapter of the Eastern Star this week at Lethbridge.

Dance, Elton School Fri June 15 —Allison Mack's Orchestra. Proceeds in aid of the Elton Girls' Softball Team. (23c)

Mr. Everard Clarke of Vernon, B.C. spent a few days this week with his parents, Mr. and Mrs. N. S. Clarke.

Mrs. Marcellus and children visited with the former's sister, Mrs. Stanley Hutchinson in Calgary on Monday.

We have a fresh supply of scratch pads now ready. Especially useful for school, store or telephone. 2 for 5 cents—Pioneer Office.

Mrs. W. Maude, Sr. and Mr. and Mrs. W. Maude, Jr. and the Misses Kathleen and Jean Maude visited with Mr. and Mrs. Abner Hunsperger on Tuesday.
